

Career Driver and Modivcare have partnered to bring a new driver lead solution to the NEMT market

How does the process work?

Tell us about your business, hiring locations, required driver licensing / other information you need to know from prospective candidates. Then tell us how many leads you need. We work off an estimated 10% conversion rate for every lead sent.

We agree as you require and then send these through to you weekly until you hit your quota. Leads include name, email, mobile and up to three bespoke questions to rule out candidates that aren't suitable.

How do we generate the leads?

We generate leads through a combination of digital marketing techniques, local and national job boards and organic daily searching through Facebook groups. These leads are collated into one central list for you.

How much does it cost?

The cost is \$12 per lead, with a minimum commitment of 10 leads. This is a discount of 20% on our normal price thanks to our partnership with Modivcare.

How do I begin?

Our partnership with Modivcare allows you to pay \$12 per lead, a discount of 20% on our normal price. Scan the QR code and let's start generating driver leads!
